

Danish Health Data Network (SDN) Support

What is SDN and Aftalesystemet (Agreement System)

Read about SDN here: <https://www.medcom.dk/medcom-in-english/national-activities/system-management/the-danish-health-data-network-sdn>

Where do I find Aftalesystemet for SDN

Aftalesystemet is available at: <https://portal.aftalesystem.dk>

User manual

You can find the user manual for Aftalesystemet at Medcom: <https://docs-stage.aftalesystem.dk/pages/viewpage.action?pageId=2621486>

How is SDN supported?

The health data network is supported as described here (in Danish) :<http://medcom.dk/opslag/support/sundhedsdatanettet-sdn>

Forgot password

If you forgot or did not get your username and password for the Aftalesystemet, you can contact us at sdn@support.netic.dk and ask for a new one.

Other system information

The DNS servers for .medcom are 195.80.240.129 and 195.80.240.130. The authoritative DNS servers are responsible for dsdn.dk, .medcom, and the reverse zones for the entire 195.80.240.0/20

The domain dsdn.dk can be searched worldwide.

If you are on the Health Data Network and DNS is set up correctly, you should be able to reach <http://www-test.netic.medcom>.

Provisioning of SDN

Provisioning (openings / closures) occurs every 1/2 hour if there have been changes in the Agreement system - this means that maximum 30 minutes after an agreement is approved, it will be open from client (network) to the service; provided that the Service Provider has remembered to open any Firewalls in its own network located outside SDN.
